WORK EXPERIENCE

BACKEND ENGINEER

Orenes group

2022 - Currently working

I work providing my knowledge and skills to help hosting any kind of game with us. I am also helping in the development of a back-office to configure games. Finally, helping in the development of a connectivity module to make it easier to work with other platforms and integrate with any casino. Stack: java, ratpack, gradle, jenkins, postgres, docker, kubernetes, JSON, api rest, kafka, kibana, cucumber, junit, git

COMPUTER ENGINEER

DQTEAM

2021 - 2022

Worked on measuring, evaluating and improving data quality according to ISO/IEC 25012 and ISO/IEC 25024 standard by creating business rules following requirements gathered in customer meetings. I created scripts based on the rules and evaluated the quality of the data with different DBMS such as MySQL, Oracle, etc. Then I made evaluation reports.

JUNIOR DEVELOPER

Dielectro Manchego

2020 - 2021

Web development and maintenance with magento and php.

TECHNOLOGIST

Alarcos research group

2020 - 2021

I measured, evaluated and visualized the energy consumption of the software with the group's own devices.
